System requirements and installation guidelines for PCT14

Eltako
ELECTRONICS

System requirements

- Operating system Windows 7 Professional and above
- Internetexplorer version 10.0 and above
- Administrative rights to install the program
- 100 MB free disk space for the files to be installed

Installation guidelines

1. An older PCT14 version has to be uninstalled via Control Panel.

2. The new PCT14 version will be installed with the installation program:
   The installation package is included in a msi-file:
   The 32 bit-msi-file has to be used with Windows 7, 32 bit.
   The 64 bit-msi-file has to be used with Windows 7, 64 bit and above.

3. The installation program offers three installation options:

   Typical:
   The program PCT14 will be installed without driver. The latest driver will be downloaded
   from the internet when the interface device will be connected to the USB interface
   if the driver was not found on the PC.

   Custom:
   It can be selected whether the program PCT14 and/or the driver should be installed.
   The driver can be installed here or can be installed later if there is no connection to the internet.

   Complete:
   The program PCT14 and the driver will be installed.
