annual average value <75%.

Wireless humidity temperature sensor pure white glossy for single mounting 80x80x17 mm or mounting into the E-Design55 switching system. With battery (lifetime 5 years). Smart Home sensor.

The humidity temperature sensor measures constantly the relative humidity between 0 and 100% (±5%) and the temperature between -20 and +60°C (±0.5°C).

It sends a data telegram within 2 minutes if changed in the Eltako building radio.

If there is no change, a status telegram is sent every 10 minutes.

This interval can be reduced to 1 and 5 minutes by plugging the jumper 'interval'. Remove the front panel.
