

Wireless sensors CE
 Hand-held transmitters FHS4, FHS6, FHS8 and FHS12, mini hand-held transmitters FMH2, FMH4, FMH2S, FMH4S and FMH8

Hand-held transmitters 154x50mm, 16 mm high.

The batteryless hand-held transmitter FHS4 contains two identical wireless modules the same as the wireless pushbuttons FT4 and has 2 rockers. It can transmit 4 evaluable wireless telegrams.

The batteryless hand-held transmitter FHS6 contains three identical wireless modules the same as the wireless pushbuttons FT4 and has 3 rockers. It can transmit 6 evaluable wireless telegrams.

The batteryless hand-held transmitter FHS8 contains two identical wireless modules the same as the wireless pushbuttons FT4 and has 2 double rockers. It can transmit 8 evaluable wireless telegrams.

The batteryless hand-held transmitter FHS12 contains three identical wireless modules the same as the wireless pushbuttons FT4 and has 3 double rockers. It can transmit 12 evaluable wireless telegrams.

Enclosed are 2 labels for the rear and 1 adhesive foil.

Mini hand-held transmitters 43x43 mm, 16 mm high. Weigh only 30 grams.

FMH2S-wr only 48 grams.

The batteryless mini hand-held transmitter FMH2 contains the same wireless module as the wireless pushbuttons FT4 and has 1 rocker. It can transmit 2 evaluable wireless telegrams. The rocker is laser engraved with 0 and 1.

The battery-free mini hand-held transmitter FMH2S-wr for call systems has a pure white rocker laser engraved in red and a gray strap.

When triggering (by pressing the red area) he sends the same wireless telegram like a wireless pushbutton and can therefore be taught-in in actuators and the FVS software. If it will be taught-in in an actuator as 'central on' as an emergency call switch the emergency can only be received with another taught-in switch with 'central off'.

For display we recommend the universal display FUA55LED with 10 LEDs.

The batteryless mini hand-held transmitter FMH4 contains the same wireless module as

the wireless pushbuttons FT4 and has 1 double rocker. It can transmit 4 evaluable wireless telegrams. The double rocker is laser engraved with 1, 2, 3 and 4.

The mini hand-held transmitters FMH2S and FMH4S are also prepared to attach a key ring.

Mini hand-held transmitters 45x85 mm, 18 mm high.

Weigh only 60 grams.

The batteryless mini hand-held transmitter FMH8 contains the same wireless module as the wireless pushbuttons FT4 and has 8 push-buttons. It can transmit 8 evaluable wireless telegrams. The housing is laser-engraved with the numerals 1 to 8.

These wireless hand-held transmitters can be stuck on the wall, glass or furniture with an adhesive foil like the wireless pushbuttons.

Teaching-in wireless sensors in wireless actuators

All sensors must be taught-in in the actuators so that they can detect and execute commands.

The teach-in process is described in the operating instructions of actuators.
