## DCM12-UC

**DC motor relay, 2 NO contacts not potential free 24 V DC/90 watt, for one 24 V DC motor. Standby loss 0.07 watt only.**

Modular device for DIN 60715 TH35 rail mounting. 1 module = 18 mm wide, 58 mm deep.

Universal control voltage 8..230 V UC. 24 V DC supply voltage.

The DCM12-UC can be operated in parallel, but they require unassigned contact outputs K2/K3 of the controlling EGS12Z-UC. These have to be connected to terminals K2/ K3 of the DCM12-UC.

The functions UP and DOWN may be blocked or switched off entirely by a rotary switch. This block applies only to the 1 connected motor. Therefore single shading elements or roller shutters can be completely or partially excepted from the automatic function of an over-all control.
