

## FSTAP-al/sz

**Wireless keyswitch for surface mounting 70 x 70 x 43 mm. Die cast aluminium, black front, protection degree IP44. Euro profile cylinder lock with 2 keys. Battery lifetime 3-5 years. No standby loss. Smart Home sensor.**

No external power supply required, so no connecting wire.

An internal 3 V CR2032 battery supplies power for several years.

To change the battery, open the housing as described in the installation instructions.

The lock has 2 positions, right and left with spring-supported return to the middle.

The wireless keyswitch transmits 2 evaluable signals that are taught into the wireless actuators.
