FSTAP-al/sz

Wireless keyswitch for surface mounting 70 x 70 x 43 mm. Die cast aluminium, black front, protection class IP44. Euro profile cylinder lock with 2 keys. Battery lifetime 3-5 years. No standby loss.

No external power supply required, so no connecting wire.
An internal 3 V CR2032 battery supplies power for several years.
To change the battery, open the housing as described in the installation instructions.
The lock has 2 positions, right and left with spring-supported return to the middle.
The wireless keyswitch transmits 2 evaluable signals that are taught into the wireless actuators.

FSTAP-al/sz	Wireless keyswitch, without wire, aluminium/black	No longer available

Recommended retail prices excluding VAT.
