SMART LIVING COMFORT - WITH THE WIRELESS ACTUATORS OF THE NEW SERIES 64.

The Series 64 from **Eltako Professional Smart Home** reaches the next level of evolution. Teach-in, switching and dimming are controlled not only by EnOcean wireless pushbuttons and wired pushbuttons but also directly per smartphone over your home WiFi network. Remote access is also possible over the internet as the series is provided with its own IP address. All smartphone links are heavily encrypted.

When operated in offline mode, WiFi, Bluetooth and EnOcean can be deactivated. From the outset, all the actuators are updatable. Future firmware updates can be loaded per WiFi via smartphone or the internet. All settings can be saved by downloading and then imported to other actuators of the same type. The actuators are Apple-certified and can be immediately taught-in into Apple HomeKit, including voice control. It will shortly be possible to teach-in actuators after a firmware update in Google Home, Amazon Alexa and other systems.

Eltako is now presenting four Series 64 actuators for flush mounting: a wireless universal dimmer actuator **FUD64NPN/110-240V**, a wireless impulse switching relay **FSR64NP/110-240V**, a wireless impulse switching relay **FSR64PF/110-240V**, as well as a wireless shading actuator **FSB64NP/110-240V**. The types FSR64NP and FSB64NP are additionally equipped with a power metering IC for the power measurement of the connected consumer.

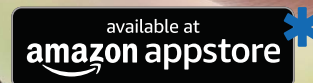

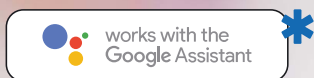

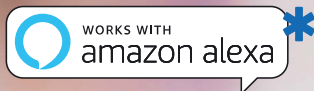

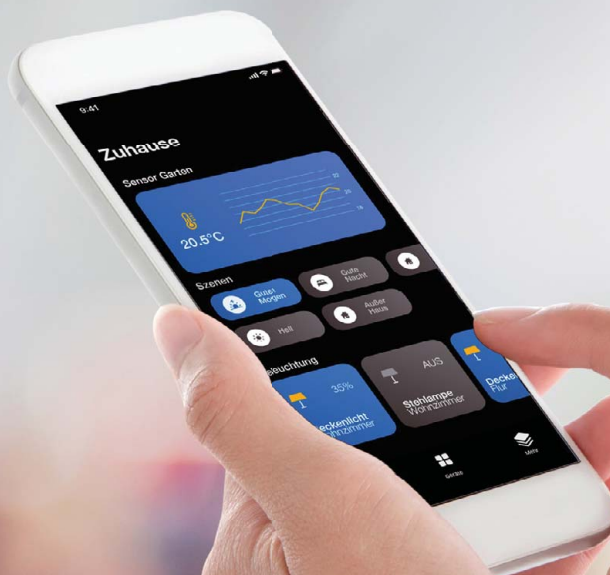

The Series 64 is compatible with the Series 61 and 62, the tap-radio and the Series 14 for the control functions with EnOcean wireless pushbuttons and wired pushbuttons. For teach-in with a wireless pushbutton the optimized tap-radio functions will be used. Plug-in terminals up to 2.5 mm² facilitate the connection. The installation depth is only 23-25 mm.

We have also developed the new Eltako app for this. With active WiFi, the functions can be set, triggered and controlled quickly and easily via smartphone.

THE ACTUATORS OF THE SERIES 64 WITH THE ELTAKO APP ARE PROFESSIONAL ALL-ROUNDERS FOR SMART LIVING.

COMPATIBLE WITH APPLE HOMEKIT, AMAZON ALEXA* AND GOOGLE ASSISTANT*.

* This function is available after an update.

THE PROFESSIONAL ALL-ROUNDERS.

- The next evolution in smart home control.
- Latest generation IoT products.
- Teach-in / switching / dimming with EnOcean wireless and wired pushbuttons, as well as via smartphone directly via the WiFi home network.
- Own IP address for remote Internet access.
- Smartphone connections highly encrypted.
- WiFi, Bluetooth and EnOcean can be deactivated for offline operation.
- Apple certified and can be taught-in into Apple HomeKit immediately, including voice control.

FSR64NP/110-240V **Wireless actuator impulse switch with** **integr. relay function 16 A**

Not potential free / with power metering

For installation

Dimensions: 49 x 51 mm, 25 mm deep

EAN 4010312320716

79,40 €/pc.

FSR64PF/110-240V **Wireless actuator impulse switch with** **integr. relay function 16 A**

Potential free

For installation

Dimensions: 49 x 51 mm, 23 mm deep

EAN 4010312321355

76,70 €/pc.

- Can be updated from the start. Advanced firmware can be imported via a WiFi with a smartphone and the Internet.
- You can update the firmware for Google Assistant, Amazon Alexa and other systems soon.
- You can save the settings via backup and also import them into other actuators of the same type.
- Control functions with EnOcean and wired buttons are compatible with the Series 61 and 62, the Tap-Radio and the Series 14.
- You use the optimized tap functions to teach-in using a pushbutton.

FUD64NPN/110-240V

Wireless actuator universal dimmer switch up to 300 W

For installation

Dimensions: 49 x 51 mm, 23 mm deep

EAN 4010312320723

89,90 €/pc.

FSB64NP/110-240V

Wireless actuator for shading elements

With power metering

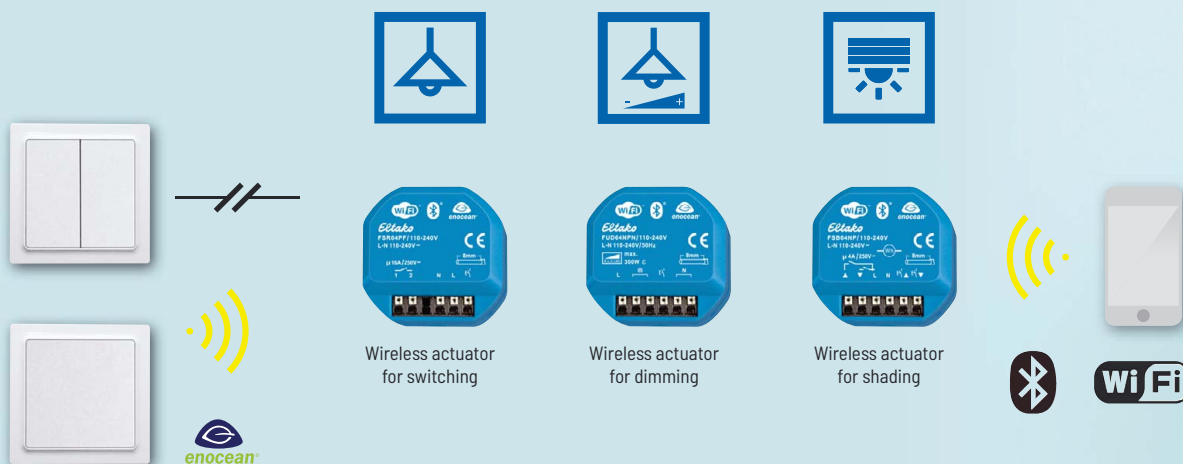

For installation

Dimensions: 49 x 51 mm, 23 mm deep

EAN 4010312320730

86,80 €/pc.
