

FAST & SIMPLE SOLUTIONS FROM ELTAKO

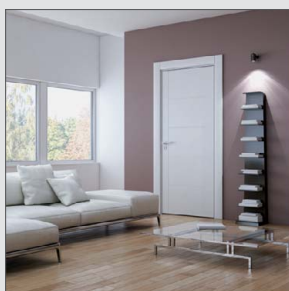

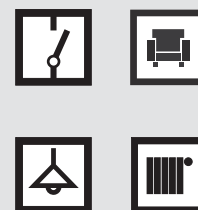

Our convenient offers for you in a short overview:

BEDROOMS IN THE HOME OR HOTELS SWITCHING-DIMMING-HVAC-WINDOWS

You are settled into bed when you realise you have left the main light on. Rather than getting out of bed turn the light off from your bedside. Or you could dim the lights, even change the heating to night set back, all from your bedside.

DIMMING LIGHTS CHANGING FROM SWITCHING TO DIMMING OF LIGHTS

If you want to update from switching to dimming of lights, especially LED you need to have the right controls that can simply be installed and set-up with the minimum of fuss and disruption. Eltako have various wireless solutions for this.

PANIC SWITCH "CENTRAL ON" HAVE YOUR HOME OR BUILDING COMPLETELY ILLUMINATED AT THE PUSH OF A BUTTON

You are in bed and woken by a noise outside your house. With the push of a button by your bedside all the lights you want, inside and out will come on.

CENTRAL OFF BUTTON TO SAVE ENERGY LEAVE THE BUILDING WITH A CLEAN CONSCIENCE

This means all the lights you want can be turned off at the push of a button situated by the front door for example. So, if someone leaves an upstairs light on in the morning it will not be left on all day while you are out.

FAST & SIMPLE SOLUTIONS FROM ELTAKO

Our convenient offers for you in a short overview:

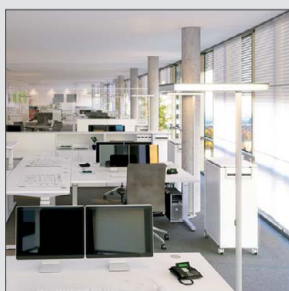

WINDOW SHADING AUTOMATIC OR MANUAL WINDOW SHADING

We all need daylight, but sometimes we can have too much of a good thing. Sunlight can make room too hot in the summer or fade fabrics or carpets. So automatic blind control will limit sunlight to desired levels. Manual control means this can always be overridden if required.

RADIATOR HEATING CONTROL CONTROL OF INDIVIDUAL OR GROUPS OF RADIATORS

With Eltako you can regulate radiators in a single room or a whole building, creating heating profiles. So, you have comfort when required and energy saving when you are out.

CONSTANT DAYLIGHT CONTROL COMFORTABLE LIGHTING DAY OR NIGHT

With PIR's, luminaires and window blind's you can create a constant light level (Lux) in the home or office. This means the right level of light to work or relax is achieved with a combination of artificial or natural light. Thus, contributing to people's wellbeing

APP CONTROL AT HOME OR OFFICE CONTROL AT YOUR FINGERTIPS WHEREVER YOU ARE

The features of Eltako solutions can be realised by having control on your digital device. Via our customised app you can control heating, lighting, blinds, etc. Create scenes, temperature profiles, monitor and control air quality and much more.
