- THE NEW DALI PROGRAM FROM ELTAKO
- ENOCEAN WIRELESS TUBULAR MOTORS WITH WHISPER MODE
- WIRELESS PUSHBUTTONS FRIENDS OF HUE
- WIRELESS MULTISENSORS WITH STM550

# 'THE HOME OF INNOVATION' – ELTAKO LIVES UP TO ITS CLAIM AGAIN THIS YEAR.

## Smart living comfort – with wireless actuators from the new Series 64

The Series 64 from Eltako Professional Smart Home reaches the next level of evolution. Teach-in, switching and dimming are controlled not only by EnOcean wireless pushbuttons and wired pushbuttons but also directly per smartphone over your home WiFi network. Remote access is also possible over the internet as the series is provided with its own IP address. All smartphone links are heavily encrypted. When operated in offline mode, WiFi, Bluetooth and EnOcean can be deactivated. From the outset, all the actuators are updatable. Future firmware updates can be loaded per WiFi via smartphone or the internet. All settings can be saved by downloading and then imported to other actuators of the same type. The actuators are Apple-certified and can be immediately taught-in into Apple HomeKit, including voice control. It will shortly be possible to teach-in actuators after a firmware update in Google Home, Alexa Home and other systems.

## The new DALI program from Eltako

Lighting control for all needs, from LED-, tunable white- and RGB dimmers up to control elements. With the new DALI program, Eltako closes another gap on the way to the perfect product portfolio.

## EnOcean wireless tubular motors with whisper mode

Opening and closing the roller shutters comfortably and quietly using a pushbutton or even using an app is very easy to do with our new radio tubular motors FRM60 for roller shutters and textile sun protection. The integrated EnOcean wireless module eliminates additional installation work for installing actuators. Simply connect the motor, teach-in the button ... done!

## Wireless pushbuttons Friends of Hue

With the new Friends of Hue wireless buttons in the E-Design55, E-Design65 and 55-switch system, Eltako is expanding its product range with ZigBee buttons.

## Wireless multisensors with STM550

These wireless multisensors combine temperature, humidity, lighting, acceleration and magnetic contact sensors in a single device. In addition to our three proven designs, Eltako even offers them as a radio mini multisensor that can be placed anywhere.
