[^0]To comply with DIN VDE 0100-443 and DIN VDE 0100-534, a Type 1 or Type 2 surge protection device (SPD) must be installed.

    ${ }^{11}$ Conctact distance of the NC contacts 1.2 mm .
    ${ }^{2)}$ Contact spacing of NC contacts 1.2 mm .
    ${ }^{3 /}$ A 40 -fold inrush current must be calculated for electronic ballast devices. For steady loads of 1200 W or 600 W use the current-limiting relay SBR12 or SBR61. See chapter 14, page 14-8.
    ${ }^{4}$ Whenever several impulse switches are continuously energised make sure there is adequate ventilation as a function of the calculated power loss.
    ${ }^{5}$ ) Due to different lamp electronics and depending on the manufacturer, the maximum number of lamps may be limited, especially if the wattage of the individual lamps is very low (e.g. with 2 W LEDs).
