## **Neat to integrate with Neets**

### **Neets® iBezel/iTop driver available!**

iRoom GmbH is excited to announce a new iBezel/iTop integration again. After great efforts of the Neets software development team, iRoom is happy to have the Neets iBezel driver integration available.

The drag & drop driver module is part of the latest Neets Project Designer 1.7.0 available here: <http://www.neets.dk>

In case of integration questions please contact Neets support team.

This plug and play integration also works with iRoom's iTop (limited functions)
